ABOUT ME

Results-driven mechanical and industrial engineer specializing in sustainable product design, operations optimization, and process innovation. Skilled in CAD/CAE, Lean Six Sigma, and manufacturing systems with a global mindset. Seeking opportunities to apply sustainable engineering principles through cross-functional projects and industrial internships.

EDUCATION AND TRAINING

12 SEP 2024 – CURRENT Luxembourg

Master in Sustainable Product Creation University of Luxembourg

Major Subjects:

FEA | Machine Design | CAD & CAE | Additive Manufacturing | Project Management | Supply chain and Logistics | Programming for Engineers | Engineering Materials | Life Cycle Assessment and ECO Design | Sensors and Signal Processing | Robotics | Integrated Management System.

Projects:

- Design and validation of the sustainable energy- Gravity Light
- Design a 3D 20kN Single-Column Screw Press: From Conceptual Design to Final Assembly
- Applied Generative Design concepts and nonlinear FEA study using a case study of Bracket
- Created a 3D prototype of the connecting rod using scanned data acquisition technology
- Study of the materials used in Thermal Protection System of the space shuttle orbital.
- In detail study of the Lean and Six Sigma tools and done one day factory assessment in webasto plant.
- Visited KUSS Drive (Germany) and experience the cutting-edge testing technologies for automobiles repair and maintenance.

Field of study Mechanical Engineering | **Level in EQF** EQF level 7

12 OCT 2016 – 31 AUG 2020 Lahore, Pakistan

Bachelor of Science in Industrial and Manufacturing Engineering University of Engineering and Technology Lahore

Major Subjects:

Production Tooling and Design | Operations Management and Quality Control | Manufacturing Processes 1 & 2 | Machine Design | Industrial Materials | Finite Element Analysis | Instrumentation and Control | Engineering Mechanics | Mechanics of Materials

Complex Engineering Problems:

- Designed, Manufactured and exhibit the power generation by foot step project as renewable source of energy.
- Design and Manufactured a sustainable and compact Kitchen Shelf considering the ergonomic aspects.
- Design the jig for blade cutter to precisely mark on the metal sheet with reasonable blade adjustments.

Complex Business Problems:

- Optimized and analyzed the effect of Covid 19 on local fast food business, Develop and suggested the operational management strategies to uplift and sustain the running business.

Data Analysis and Reporting:

- Visited a chemical plant and design the survey report on safety, health and environment and potential risk associated

Website www.uet.edu.pk | **Final grade** 3.34 out of 4 | **Level in EQF** EQF level 6 |

Thesis Synthesis and characterization of mirco/nano aluminum particles through electric discharge machining

WORK EXPERIENCE

The Hawks Lahore, Pakistan

Subject Matter Expert in Operational Excellence

4 Oct 2022 – 30 Jun 2024

- Worked with company internal CF team on designing a customized Factory Assessment Tool for the client's organization assessment.
- Worked under principal consultants in defining the scope of the projects and team building.
- Promoted the ERCS culture (Eliminate, Rearrange, Combined, Simplify) and implemented the other lean tools on client (Vision Polymer Pvt. Ltd) working space that produces the shoe sole.
- Designed the process layout for the client (Pakeeza Commercial Kitchen Pvt. Ltd) that make the commercial kitchen products for McDonald's, KFC and other food chain in Pakistan.

Management and Business Excellence Consultancy Lahore , Pakistan

Subject Matter Expert in Operational Excellence

14 Mar 2022 – 13 Sep 2022

- Worked under the supervision of the experts on benchmarking and business process reengineering of Client Organization (Raniyal Chemicals Pvt Ltd)
- Designed the road maps on identified gaps and bottlenecks hands-on experience with the creep management
- Worked on visual management project in home appliances industry (Client: Canon Pvt. Ltd)

Style Textile Pvt Ltd Lahore , Pakistan

Industrial Engineer Executive

7 Oct 2020 – 13 Jul 2022

- Introduced smart work by designing the work aids and patterns to counter the skill requirement of the fresh worker.
- Collaborated with the quality team on quality control (inspection list) and deployment of the quality assurance tool (TLS).
- Reduced the unplanned production changeovers by 40% through the effective resource planning and worker skill matrix improvement.
- Performed regular operations like production target/ forecasting, waste identification and improvement plan to ensure the desired production efficiency (more than 80%)
- Performed internal audits and reporting for ADIDAS on weekly basis focusing on plant efficiency, innovation and worker skill matrix improvement.

Total Parco Lube House Lahore, Pakistan

Internee

1 Jun 2019 – 31 Jul 2019

- Conducted a detailed study on lubrications types and analyzed their impact on equipment performance.
- Studied the operations of after sales services and client relation management system.
- Visited multiple industries to observe different industrial processes and resolved complex engineering problems related to equipment failures.

TECHNICAL SKILLS

Design & Simulation:

Autodesk Inventor, Ansys, Fusion 360, Autodesk Inventor Nastran, SolidWorks, CATIA, Solid Edge

Analysis & Management:

FEA, Life Cycle Assessment, Lean and Six Sigma

Software & Tools:

MS Office, SharePoint, Webex

Programming:

Python , MATLAB and Simulink

CONFERENCES AND SEMINARS

27 NOV 2025 – 29 NOV 2025 Digital Learning Hub, Luxembourg

Advanced Industrial Robotics (Master advanced Python programming for robotic applications)

Executed complex robotic operations with precision and efficiency
Analyzed and Implemented industrial robotics use cases
Integrated robotics with IIoT for enhanced automation

24 NOV 2025 – 26 NOV 2025 Digital Learning Hub, Luxembourg

Vision Systems for Industrial Robots

Applied vision-based quality control techniques and accurately determine object coordinates.
Detected patterns, shapes, and objects using vision algorithms and apply them to real-world scenarios.
Developed solutions for waste sorting and color recognition in robotic applications

18 NOV 2025 – 22 NOV 2025 Luxembourg

From Code to Motion: Combining Robotics and Coding for Industrial Automation

Utilized sensors and actuators effectively in robotics systems.

Developed and implemented robotic solutions to perform specific tasks, both manually and autonomously

6 NOV 2024 – 6 NOV 2024 Luxembourg

Uni-Career Project Management

Learned Activities

-Project Management principles and processes.

-Two approaches, Waterfall and Agile.

-Three Standards for project management (PMI, Prince2 and Scrum)

6 APR 2023 one day CPD live webinar by Pakistan Engineering Council HQ Islamabad

Artificial Intelligence: Implication for Technologies & Business Strategy

21 APR 2022 Online Session by National Productivity Organization

Total Productive Maintenance (TPM) fastest way to improve Productivity and Efficiency

INFORMAL EDUCATION

2017 – 2020

Transportation of Goods

After the death of father, I managed the family business in parallel with my bachelor studies and experienced the transportation, logistic and diverse culture of Pakistan.

SOCIAL RESPONSIBILITY AND VOLUNTEER WORK

23 MAR 2020 – CURRENT

Founded charity program "One Nation Action Plan 2020 (ONAP 2020)"

I raised fund of 0.5 million in 2020 and served 80 victim families of COVID-19 with grocery of one month. Now ONAP2020 is acting as a source to many deserving families every year without disclosing identities of both sides.

LANGUAGE SKILLS

MOTHER TONGUE(S): Urdu

OTHER LANGUAGE(S): English , French

RECOMMENDATIONS

Claude WOLF Senior lecturer Department of Engineering

Professor Claude WOLF is my current case study supervisor and also he taught me CAD/CAE subject

Email claudio.wolf@uni.lu |
